---

Dear Friends,

As COVID-19 continues to impact our communities, here at EGPS we wanted to touch base with you and share what we are doing from our end.

As information and details related to COVID-19 evolves, our sincere thoughts go out to all who are impacted. This situation is unprecedented for everyone — we are all learning as we go, making necessary adjustments daily, and adapting as needed.

We are fortunately set-up as an organization to work remotely. This allows us to proceed, “business as usual” so we can continue to deliver the level of service you have come to expect from us.

We are following all recommended precautions directed from federal, state, and local governments to keep us all healthy and safe.

Most of our resources are virtual: Our IT is in the cloud and hosted by Amazon Web Services. Our client files are stored electronically, and our software services are either directly cloud-based or run within our cloud servers. Our phone system is VOIP, which means that our employees can take calls anywhere. For the most part, we are operating normally, and our services will be uninterrupted.

EGPS is committed to continue offering our consultative services to help you and your business get through this uncertain time. We will also continue to explore ways in which we can enhance the delivery of our services through electronic means, and we will continue to communicate with you through email or secure portal. Please watch for these communications.

We encourage any questions or concerns to be directed through your current EGPS relationships, those relationships you have come to count on in the past and are still here for you today.

We will continue to keep you updated as things evolve. We sincerely hope you and your families are safe and healthy!

All the best.

*Daniel Liss*
